ACTIVITY FUN-SHEET

- CONSTRUCTION TECH
- CULINARY ARTS
- FLEET & FACILITIES
- FIREFIGHTER / EMT
- INDUSTRIAL TECH
- MACHINING TECH
- WELDING

Part 2 The tall dark man is actually a rubber dummy. Students practice defending themselves by hitting him. This was a close call for the adventurer who is seeking to find if Pioneer Tech truly lives up to their mission.

Dr. Terri LearnsALot breathes in the fresh smell of wood from _____ as she quickly moves on to another program. She sees tools that allow students to build. Working her way further down the halls, she hears printers and after entering the room notices they are all printing the same thing for _____. They are extension tabs to help those wearing masks during the COVID-19 Crisis.

_____ is bright and someone is tinkering with a tire. She moves to _____ before they see her. This program has a person holding fire, but wait, they are actually building something. Their mask is about to come up, so Terri scurries to _____ where huge machines shape metal into just about anything. Suddenly the sirens go off in the _____ program and Terri runs to see what's happening. But she misses the giant fire engine as it leaves to train students how to save lives.

Sweet smells hypnotize Terri as she enters _____ where she finds chocolate chip cookies waiting. Students must master cooking/baking in this program. The adventurer grabs 2 cookies when someone says freeze. Moving quickly she is chased toward the exit but looks back knowing that Pioneer Tech is a true treasure of knowledge for its students. The adventurer notices someone in the Emergency Services Training Center watching her from afar. Suddenly her cell rings and the voice says, "Don't worry Dr. LearnsALot, we will continue to Enhance Lives & Secure Futures for our students!" The knowledge seeker smiles knowing her mission has been fulfilled.

The 
END
